Good day,

  I am AbdulMajid, a fourth year computer scientist. Keeping in mind you have other candidate's proposals under review, i will be keeping this brief and very much as concise as i can be. Below are the reasons why i am, without doubt, the best candidate for this role.

   * I have a Computer Science degree in one of the most prestigious school in Nigeria.
   * I have 4+ years of experience in the required field for this role.
   * I am a self_taught programmer which gives me the ability to grasp and learn new things without much mentoring/guidance.
   * I am very much fluent in communication.
   * Unwavering dedication, attention to the task assigned.
   * I am a team player and i focus on delivering top notched work.

  Listed above are the basic reasons why i should be hired for this role. Below are what the company gets from me if i am hired.

   * Experienced working with the Python Programming language and it's various framework(Django, Django Rest and Flask).
   * Strong Understanding of APIs.
   * Worked with a ticketing tool i.e Jira.
   * Efficient usage of version control i.e Git, Github.
   * Very much fluent working with the Linux environment.
   * Worked/working with various databases including MYSQL, Postgres, SQLAlchemy, Sqlite3.
   * Worked/working with containers i.e Docker.
   * Currently on my Journey to becoming a DevOps Engineer.

  I hope you are almost convinced if not convinced already why i am a perfect fit for this role. Here is a link to my portfolio where i spoke extensively, though brief on the projects i have worked on to back my skills up and various technologies used while working on them.
